

ARGOS CLIENT PORTAL

We live in a connected, globalized world. For businesses to navigate, grow and thrive in the 21st century's global marketplace, translation and localization is at the forefront of many international business's growth strategies.

Argos Multilingual has aligned with these strategies by building a localization ecosystem which connects our clients with the localization process effortlessly – The Argos Client Portal.

The portal is designed to make the localization process easy. Accessible via the Argos Multilingual Website, the Portal's responsive design lets you login on any device, anytime and anywhere in the world. From the tiled dashboard on your home page, localization management is at your fingertips.

The screenshot displays the Argos Client Portal dashboard. At the top, there is a navigation bar with the Argos Multilingual logo on the left and the following items: Home, Projects (6), Pending quotes (2), Reports, Request, CTZ: +01:00:00, Hello Colinda, and a Logout button. Below the navigation bar is a header section with the word "Home" and a background image of a wooden structure. The main content area features four colored tiles: a red "Request" tile with the subtext "Request a new project or quote", a green "Projects (6)" tile with "Track the status of your projects", an orange "Pending quotes (2)" tile with "Review and approve quotes online", and a purple "Reports" tile with "Access and download the reports you need". To the right of these tiles is a "Latest news from Argos Multilingual" section containing three news items: "Making a Unique Localization Situation Work" (February 24, 2015), "Celebrating the Diversity of Languages Around the World" (February 23, 2015), and "Argos Multilingual awarded with the Gazele Biznesu Award for 2014" (January 30, 2015). A "Show More" button is located at the bottom of the news section.

Translation statistics

This report shows translation word count, leverage and value figures sorted by language pair combination by month, quarter and date. The report can be pivoted in order to create your own report.

On Time Delivery

This report shows planned due dates and actual delivery dates, calculating the delta between them. It shows figures in a table and graphical format and allows filtering and exporting to Excel.

Missing purchase orders

This report shows quotes without a corresponding Purchase Order. It can be grouped and filtered, and allows to enter the missing Purchase Orders directly.
